## **DETAILED ACTION**

### ***Terminal Disclaimer***

1. The terminal disclaimer filed on July 8, 2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on Application No. 10/511,203 has been reviewed and is accepted. The terminal disclaimer has been recorded.

## **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: This application teaches a hydrous kaolin pigment having a GE Brightness of at least about 90.0 and a steepness ( $d_{30}/d_{70} \times 100$ ) of at least about 39. The closest prior art of record is US Patent No's. 4,227,920, 3,857,781, 6,808,559 issued to Chapman et al., Maynard and Golley et al. respectively and US Patent Application Publication No. 2005/0098283, issued to Golley et al. Both the Chapman and Maynard references teach a kaolin pigment but fail to teach or fairly suggest the steepness as claimed by applicants. It is the examiner's position that the steepness of the kaolin pigment would not be inherent since the kaolin starting materials are different. The Golley et al. references have been disqualified under 35 U.S.C. 103(c) as prior art in a rejection under 35 U.S.C. 103(a) since applicants have declared that the instant application and U.S. Patent No. 6,808,559 and US Patent Application Publication No. 2005/0098283 were, at the time the invention of the instant application was made, commonly owned. Accordingly, the

103(a) rejections over the Golley et al. references have been overcome and the application is allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
